### COMNAVAIRESFOR INSTRUCTION 3060.2A

Subj: NAVAL AIR RESERVE FORCE IMPLEMENTATION DIRECTIVE FOR  
COMNAVRESFORINST 3060.5A (MANPOWER MOBILIZATION SUPPORT  
PLAN (MMSP))

Ref: (a) COMNAVRESFORINST 3060.5A  
(b) OPNAVINST 3060.7A

1. Purpose. To provide guidance for implementing Commander,  
Naval Reserve Force (COMNAVRESFOR) MMSP.

2. Cancellation. COMNAVAIRESINST 3060.2

3. Background. The COMNAVRESFOR MMSP provides the Naval Reserve with mobilization policy, guidance, responsibilities, and procedures. Echelon III commands are required to develop implementing directives per reference (a). Echelon IV and V commands are required to develop MMSPs in consonance with their higher echelon implementing directive or plan. Subsidiary MMSPs should serve the unique needs of the preparing activity. Given the disparate role preparing commands play in the logistic and administrative support of mobilized Reservists, it is neither feasible nor desirable to issue specific requirements for the content of all MMSPs. Discretion should be given to subordinate commands to omit sections that clearly would not be relevant or useful, and to include additional sections needed to answer key mobilization planning questions.

#### 4. Action

a. Commander, Naval Air Reserve Force (COMNAVAIRESFOR) echelon IV and V commands will develop a local MMSP per references (a) and (b). Development of a local MMSP should not involve the duplication of information, guidance, or procedures already contained in these references. MMSPs should be updated continuously, but not less than annually. The Immediate Senior in the Chain of Command is designated as the reviewing authority for subsidiary plans and shall maintain copies of their subordinate commands' MMSPs. Echelon IV commands shall include COMNAVAIRESFOR (N5) on the distribution of their MMSP. COMNAVAIRESFOR will ensure compliance with these requirements during command assessments.
